

Avon C50 Respirator Inspection

Item	Condition	Comments
Inspect for cuts or tears in the rubber components - face skirt, nose piece		
No chips/cracks in plastic components: facepiece, buckles, exhalation valve, drinking port		
The face shield is clear without cracks or holes		
Straps are undamaged with elastic in good condition		
Cloth head harness is intact without excessive stretching or tears		
Canister gasket is pliable without damage		
Brow straps are intact, correctly adjusted & ends properly secured in brow strap pockets		
Temple straps are correctly adjusted and buckle clamp plates are down.		
Lower two cheek straps are fully slack to enable easy donning		
Confirm the correct canister is to be used and with expiry		
The filter mount plug is properly seated and undamaged		
Facepiece is complete, correctly fitted and adjusted for wear		
Fit check - straps should be tight but comfortable when adjusted.		
Positive pressure check and Negative pressure check performed		
Inspector/Date: _____
